

Shower Curtain Care

Hand Wash:

Use mild soap and warm water, then rinse with water and hang dry. For hard to clean spots use a standard household cleansers and a soft bristle brush. Heavy “dried on” soil may first require soaking to loosen the debris. **DO NOT USE HARSH CLEANSERS OR SOLVENTS.**

Machine Wash:

Bestbath® does not recommend regular machine laundering of curtains as this type of laundering may decrease the useful life of the curtain's fabrics. If machine laundering is necessary do so with a gentle cycle and avoid washing / rinsing with temperatures exceeding 100° f. Hang dry and do not iron.
